Create or manage federated users instead?

This tenancy has a federation with one or more identity providers (IdP), which means users typically sign in as federated users. This page creates local users, manages their local capabilities, and lets them sign in to Oracle Cloud Infrastructure if the federated IdP is unavailable. To create and manage federated users, go to the [Federation page](#) to find the appropriate IdP Details page.

Groups

Create or manage federated groups instead?

This tenancy has a federation with one or more identity providers (IdP). This page creates local groups and manages the memberships of local users. To create and manage groups for federated users, go to the [Federation page](#) to find the appropriate IdP Details page.
